

**MONTANA RECLAIMED LUMBER CO**  
QUALITY ANTIQUE LUMBER PRODUCTS

## ANTIQUE CHESTNUT FLOORING

American chestnut trees were once a dominant hardwood species in North America, until the chestnut blight decimated the population to very near extinction in the early 1900's (fewer than 100 trees remain). While efforts continue to bring back a blight-resistant variant of this magnificent tree, the only source of chestnut lumber is reclaimed. The rich brown in chestnut makes for a stunning floor with a dramatic history.

Our flooring has been kiln dried. During the milling process, we add back relief for stability and square-edge tongue-and-groove joinery for straightforward installation. See images for our surface texture options.

### FLOORING SPECS

board thickness	3/4" solid
board widths	3-12"+
board lengths	3-10'+
