

MONTANA RECLAIMED LUMBER CO
QUALITY ANTIQUE LUMBER PRODUCTS

CORRAL BOARD PANELING

Sun, wind, rain, snow, and plenty of time collaborate to create the gray tones in our corral board. Of all of our products, none more truly represents the iconic rural Montana landscape, with its miles and miles of fence lines, interrupted by the occasional outbuilding or corral. The available dimensions are defined by what fences are made from: 2" x 6", 8", 10", 12". From those, we can mill it smaller to fit your project.

Our corral board paneling will include nail holes, strapping marks, rough and smooth texture and other historical character. It can be milled with two ripped edges for consistent widths and/or backplaned to a consistent thickness and has been kiln-dried. We also offer a variety of millwork profiles.

PANELING SPECS

available widths	6-12"
milling options	as-is; backplaned to thickness; edged to consistent widths; ship lap or tongue and groove edge profiles
