QUALITY ANTIQUE LUMBER PRODUCTS

STRUCTURAL STICKS RESAWN TIMBERS

These antique timbers came from densely grained, old growth trees and provided the structural framework for agricultural buildings, factories, warehouses, hangers, ship-yards, and other commercial buildings. Produced after the advent of the industrial mill, they range in size from 6" x 6" to 24" x 32" and beyond. The fresh milled version of our Original Patina Douglas Fir, these timbers can be cut to specific and unique dimensions. The resawn surface easily accepts stain and other finishes, making it especially well suited to projects requiring a consistent color.

TIMBER SPECS

available sizes	4" x 4" to 12" x 20"+
species	Douglas-fir
grading	structural timber grading available upon request
